

Annual Report of Faculty Salary Competitiveness
Prepared by the UCSC Academic Personnel Office
March 2012

BACKGROUND

In its report of September 10, 2008, the Joint Senate-Administration Task Force on Faculty Salaries recommended that the campus establish a regular annual report on the competitiveness of UCSC's ladder-rank faculty salaries.¹ The annual report serves to monitor the relative standing of Santa Cruz ladder-rank salaries within the UC system. It also addresses the faculty's progress through the ranks by correlating current rank and step with time since terminal degree.

The two goals outlined in the Joint Task Force Report were to raise the median off-scale dollar amount at UCSC to the median off-scale amount at the next lowest campus, identified as UCD, by July 1, 2009; and to raise UCSC's median faculty salary to the UC systemwide median (including UCB and UCLA) by July 1, 2011. In response to this, the Campus Provost and the Senate Committee on Academic Personnel worked together to revise the campus guidelines for salaries awarded in greater-than-normal and accelerated ladder-rank faculty personnel actions. The new guidelines initially applied to personnel actions in the 2008-09, 2009-10, and 2010-11 review years and allowed more generous off-scale amounts to be awarded in connection with the merit process. This salary program has been extended for an additional three years (2011-12, 2012-13, 2013-14).² In addition to providing a monitoring function, the annual report provides an indicator of whether UCSC is moving closer to the goals outlined by the Joint Task Force.

DATASET

The data presented provides a comparison of the median salaries and off-scale amounts for academic-year ladder-rank faculty at the nine general campuses (excluding UCSF as a health sciences campus). Data is provided for salaries effective 10/1/08, 8/1/09, 7/1/10, and 9/1/2011. While there has been discussion on whether the salary data is best presented as mean or median, the 2011 data is presented in the same format as the previous years' reports for ease of comparison.

The data for the current report was taken from the September, 2011 payroll extract in the UCOP Corporate Data Warehouse (CPS). This data does not reflect the merit-based salary adjustment effective October 1, 2011. There are two primary reasons to select the data prior to the October 1 salary adjustment:

- There are currently two salary scales in effect for ladder rank faculty.³ The adjusted scale reflects the 3% merit-based salary increase received by faculty who met the established eligibility criteria. Faculty who did not meet the eligibility requirements for the salary adjustment remain on the minimum scale until they complete their next positive merit review. There is no indication in the data available from the CPS which of the scales is the basis for the salary associated with a particular appointment, so it is not possible to reliably determine the

¹ The term "faculty salaries" used throughout this report refers to the annual salaries for academic-year ladder-rank faculty. The Joint Senate-Administration Task Force on Faculty Salaries Report dated September 10, 2008 can be accessed [here](#).

² See [memo](#) from Campus Provost and Executive Vice Chancellor Kliger dated 10/8/09 and [memo](#) from Campus Provost and Executive Vice Chancellor Galloway dated 5/31/11.

³ The current salary scales can be viewed [here](#).

off-scale amount after October 1, 2011. While we can determine from other records at our campus level which of the two scales a particular salary is based on, it was not possible to reliably make those determinations for data from other campuses.

- Under the salary program, campuses were directed to develop their own eligibility requirements and implementation procedures. For example, some campuses will be applying retroactive increases once a positive merit is awarded during an expanded merit-based salary program review period. Even if we could reconcile the CPS data against campus-level records from all other campuses, it would likely not be possible to arrive at a data set that would be consistent and reliable.

To be consistent with the Joint Task Force Report, the annual report examines four groups of faculty: Assistant Professors, Associate Professors, Full Professors Steps 1-5, and Full Professors Steps 6-9. Salaries of Professors Above-scale are not included in this report. Salaries of fiscal-year faculty are also not included because discipline specificity might distort the comparison (e.g., astronomers at UCSC and faculty of the College of Agricultural and Environmental Sciences at UCD). Discipline-specific comparisons are limited to data for faculty salaries on the Regular (REG) or the Business/Economics/Engineering (BEE) salary scales.

To increase comparability across campuses, salaries from professional schools were omitted from the dataset. The method used to determine which professional schools to omit from the dataset was the same as that developed by the Joint Task Force for the 2007 dataset.⁴ A complete description of the procedure used to pull the dataset from the University of California Office of the President (UCOP) Data Warehouse and the ensuing data cleansing is presented in Appendix 1.

SALARY COMPARISONS

Although the same salary scales are used for the professorial ranks throughout the University of California system, there are marked salary differences among campuses. To better capture these differences, this report presents information on both median total salary and off-scale salary component. The dataset used to provide the bar graphs can be found in Appendix 2.

1) Regular Salary Scale (Figures 1, 2, and 3)

In 2008, UCSC had the lowest median salaries in the UC system, or tied for the lowest, at every rank. In 2011, UCSC median salaries have surpassed the median for UCD, UCR and UCI at the Assistant rank and for Full Professors at Steps 1-5. At the Associate rank, UCSC has surpassed UCD and is tied with UCR.

UCSC's median salary at Full Professor Steps 6-9 was tied for the lowest (with UCR) in 2008, rose to the eighth slot in 2009, and tied with UCR again for the lowest in 2010, trailing the next lowest campus (UCD) by \$524. In 2011, UCSC is again tied with UCR for lowest median salary at Full Professor Steps 6-9.

⁴ Deletions: UCLA Grad Information Studies; UCB Grad Information Studies; UCB Optometry; UCI College of Health Services; UCLA School of Public Health; UCB School of Public Health; UCSB Bren School of Environment; UCB Goldman School of Public Policy; UCSD Graduate International Relations & Pacific Studies; UCB Boalt School of Law; UCLA School of Public Affairs; UCB School of Social Welfare

UCSC median salaries continue to lag the systemwide (9-campus) median at all ranks on the Regular scales, though there have been significant gains at the Assistant and Associate ranks and at Professor Steps 1-5. In 2011, UCSC median salaries exceeded the 7-campus median (excluding UCB and UCLA) at the Assistant rank and for Full Professors Steps 1-5 and slightly lag (0.32 percent) for the Associate rank. In 2011 the salary lag to the 7-campus median has increased at Professor Steps 6-9 compared to previous years.

Median off-scale amounts (the salary component above the rate specified by the salary scale for each rank and step) have increased every year since 2008. In 2011, UCSC's median off-scale amount exceeds the 7-campus median for all ranks except Assistant Professor. The gap between UCSC's median off-scale amounts and the 9-campus median off-scale amounts closed at every rank between 2008 and 2011. At Full Professor Step 6-9, UCSC's median off-scale amount surpasses four of the other campuses and is tied with UCB. See Summary Statistics on pages 7-8 and Campus Statistics on pages 21-22 for median off-scale data.

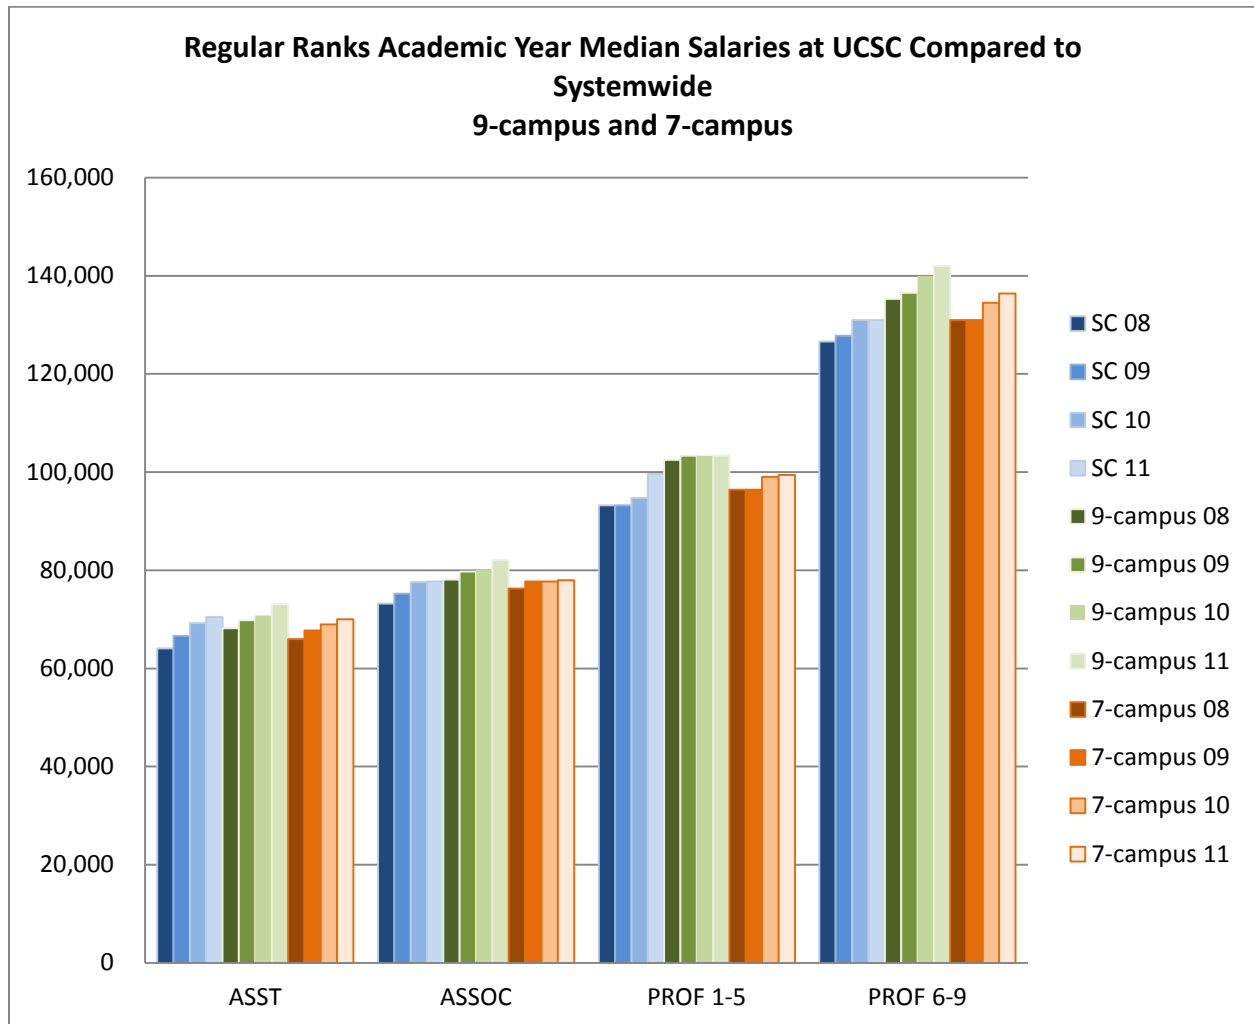

Figure 1. UCSC Regular Ranks median salaries for 2008, 2009, 2010 and 2011 when compared against the median salaries for all nine general campuses (no UCSF) or seven general campuses (no UCB, UCLA, UCSF).

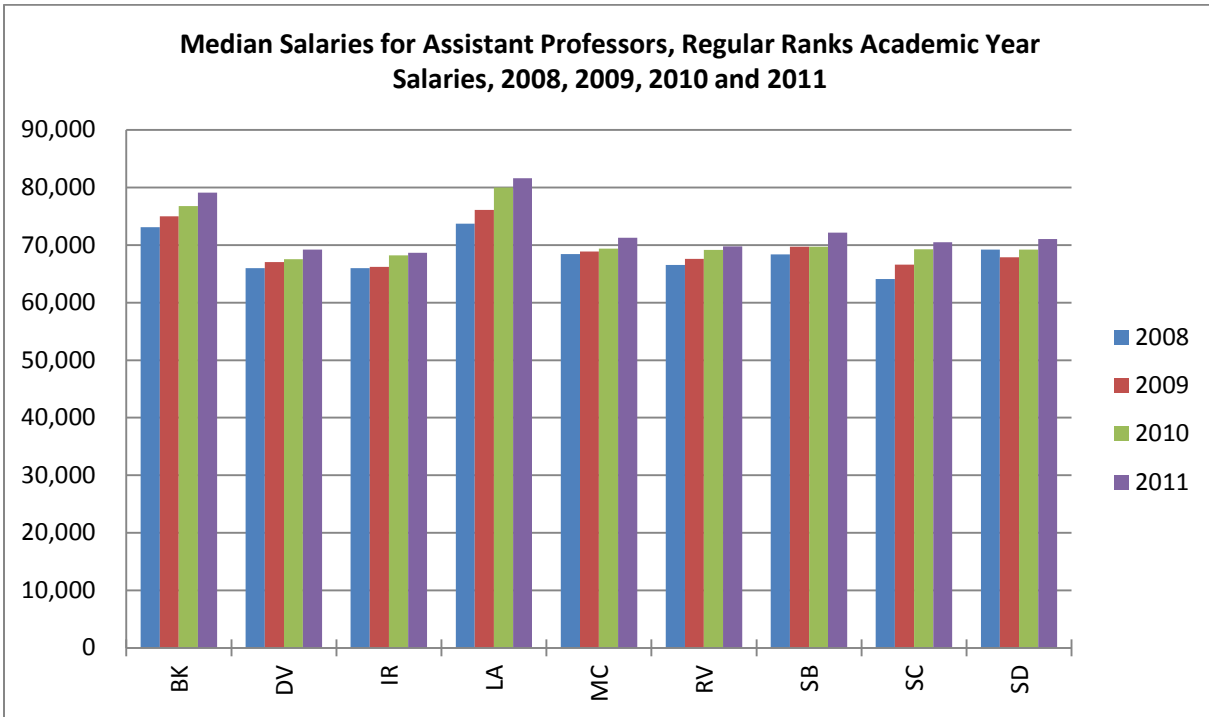

Figure 2. Median salaries for 2008, 2009, 2010 and 2011 for all nine general campuses for Assistant Professors (top) and Associate Professors (bottom).

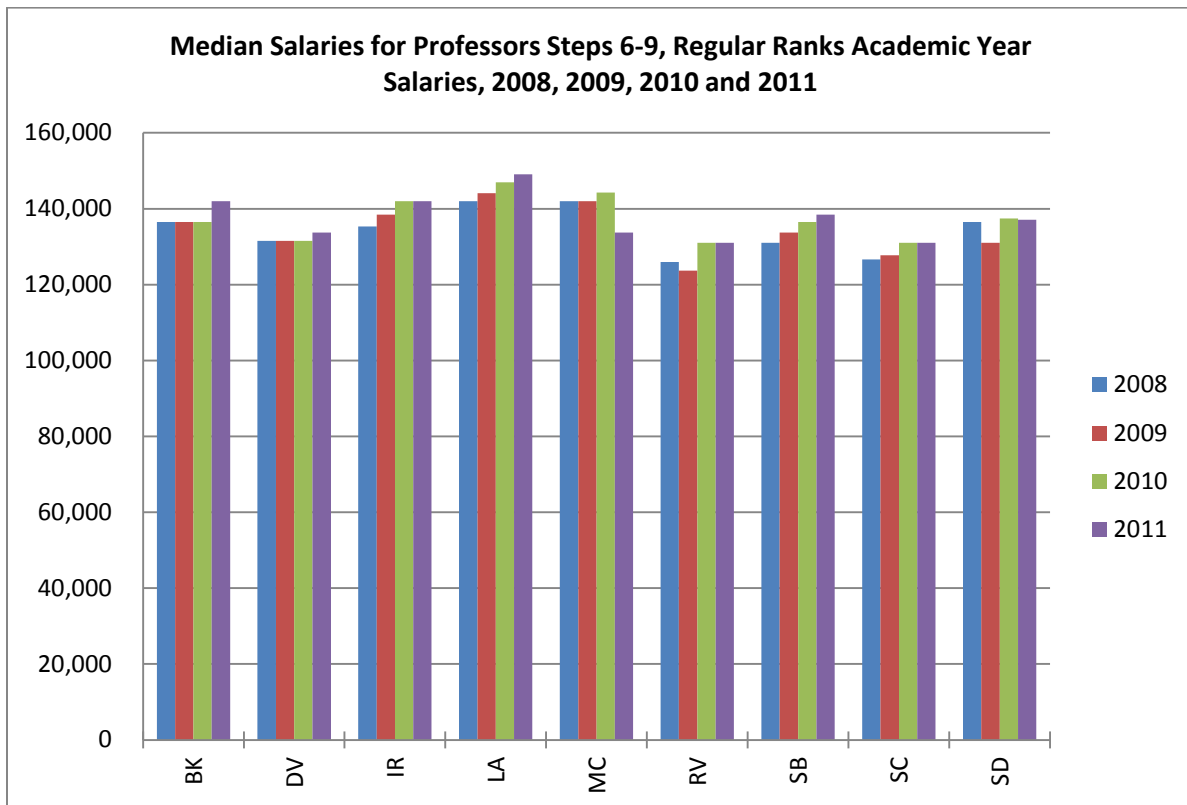

Figure 3. Median salaries for 2008, 2009, 2010 and 2011 for all nine general campuses for Full Professors, Step 1-5 (top) and Full Professors, Step 6-9 (bottom).

2) Business/Economics/Engineering (BEE) Salary Scale (Figures 4, 5, and 6)

In 2008, UCSC had the lowest median BEE salaries in the UC system for Associate Professors and Full Professors, Steps 1-5. UCSC's median BEE salary at Associate Professor surpassed the next lowest campus in 2009 and continued to grow in 2010. UCSC's median BEE salary at Full Professor Steps 1-5 increased in 2009 and surpassed the next lowest campus in 2010.

In 2011, UCSC's median BEE salary exceeds the systemwide (9-campus) median at Assistant Professor and Full Professor Steps 6-9. At Associate Professor, UCSC's median salary is 1.3 percent below the systemwide median. UCSC is currently tied with UCD for the lowest median salary at Professor Steps 1-5.

In 2011, UCSC off-scale salary amounts on the BEE scale are not the lowest in the system at any rank. Median off-scale amounts continue to lag the systemwide medians at all ranks except Full Professor Steps 6-9; however, UCSC off-scale amounts exceed or tie the 7-campus median (excluding UCB and UCLA) at all ranks.

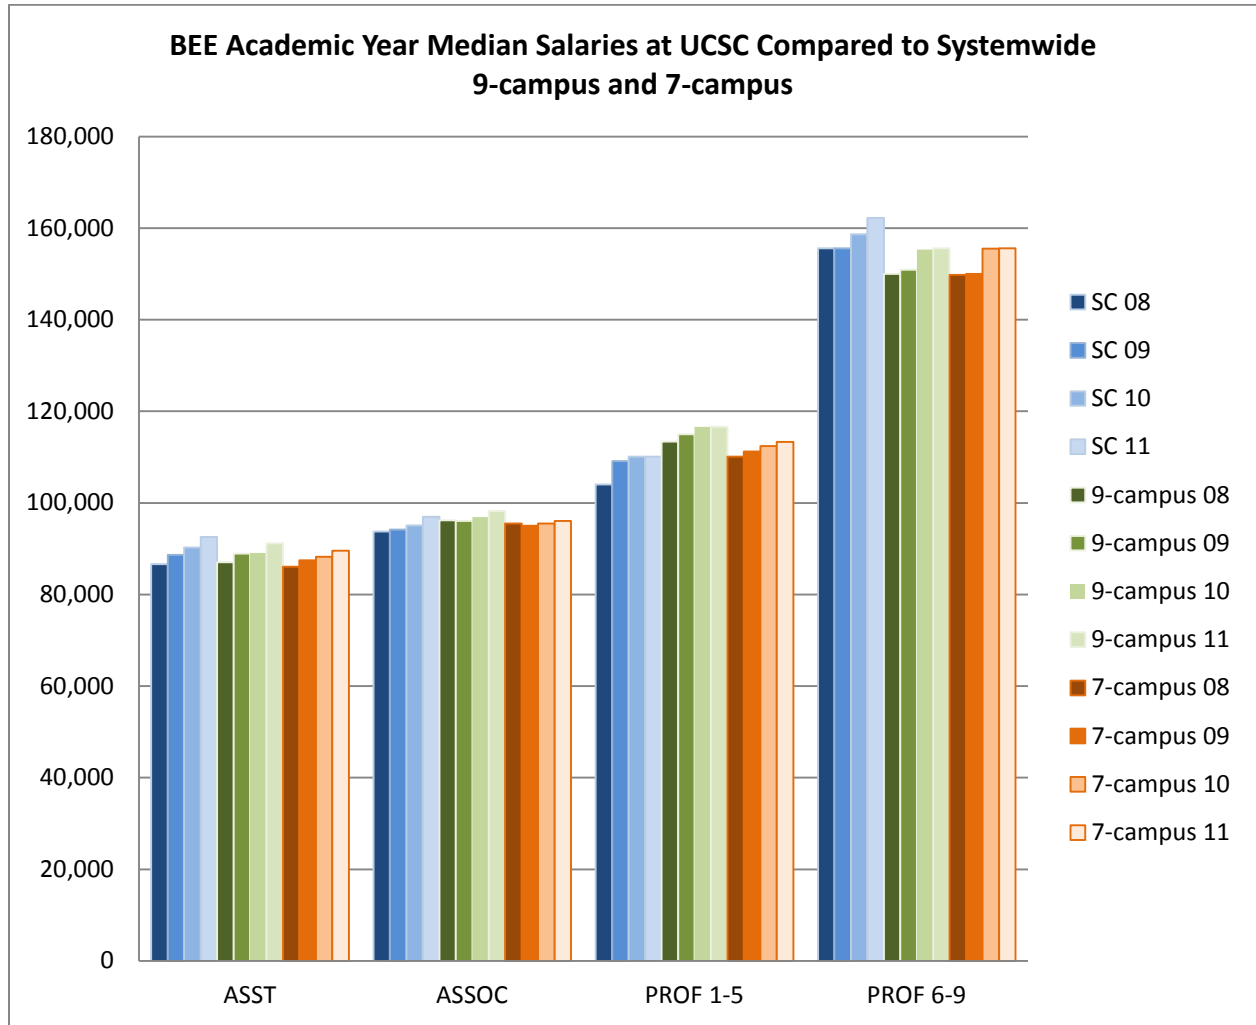

Figure 4. UCSC BEE median salaries for 2008, 2009, 2010 and 2011 when compared against the median salaries for all nine general campuses (no UCSF) or seven general campuses (no UCB, UCLA, UCSF).

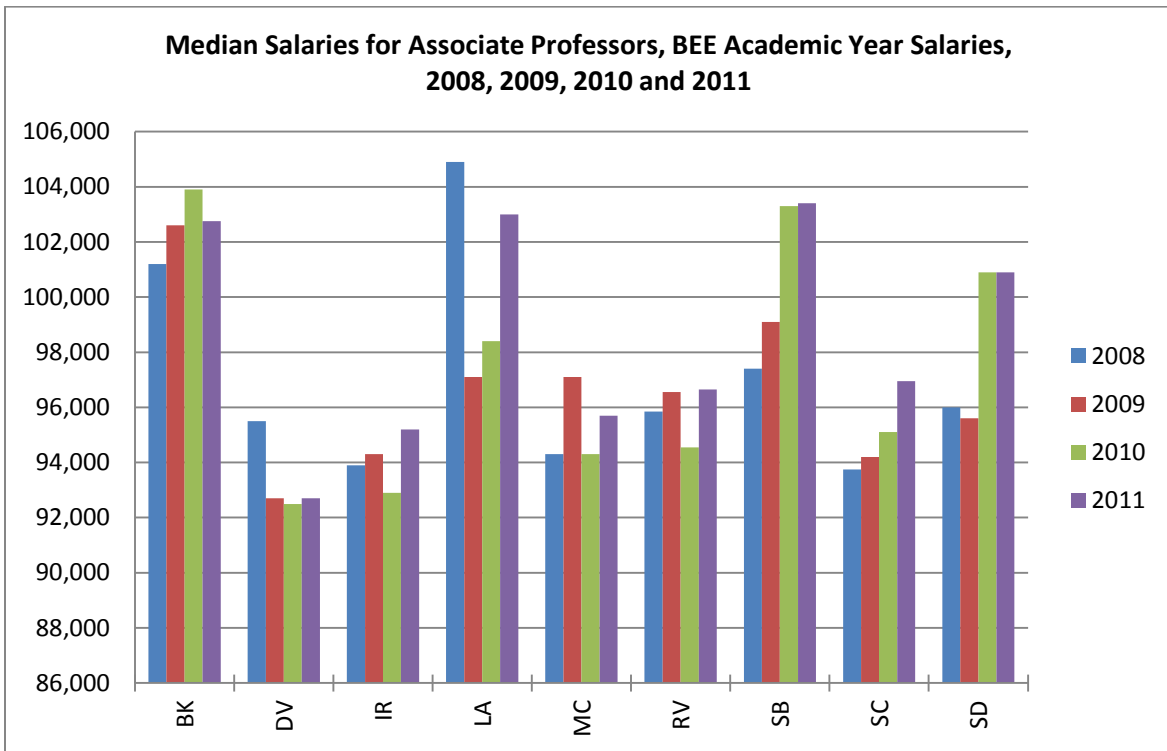

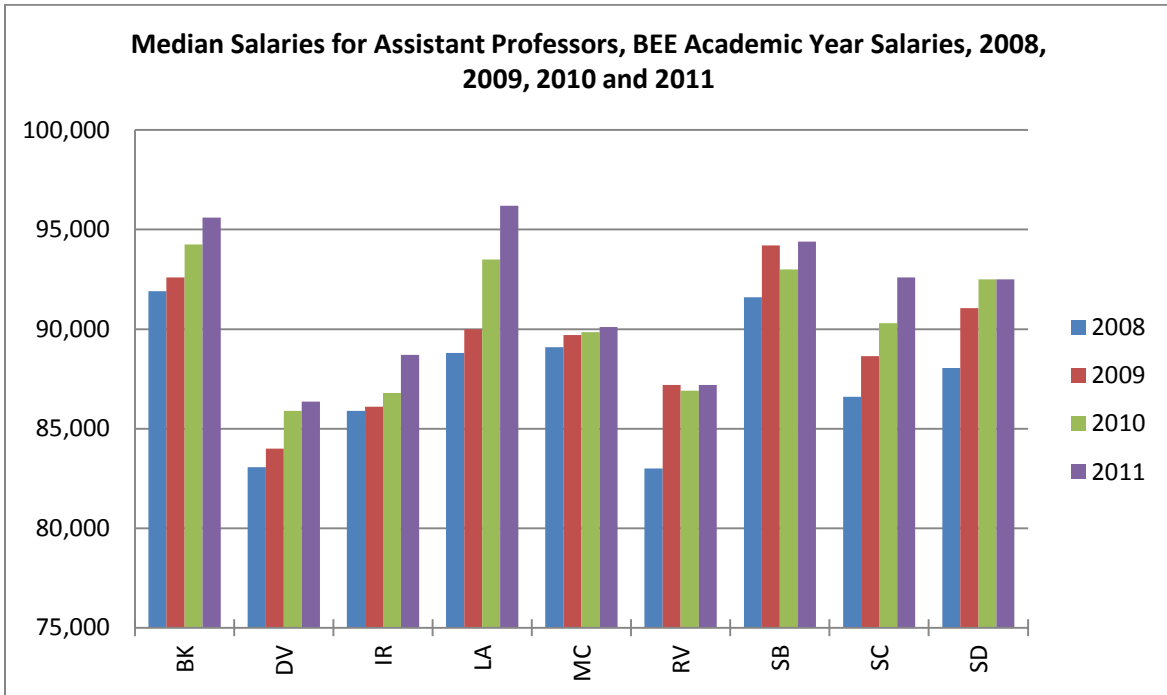

Figure 5. Median salaries for 2008, 2009, 2010 and 2011 for all nine general campuses for Assistant Professors (top) and Associate Professors (bottom).

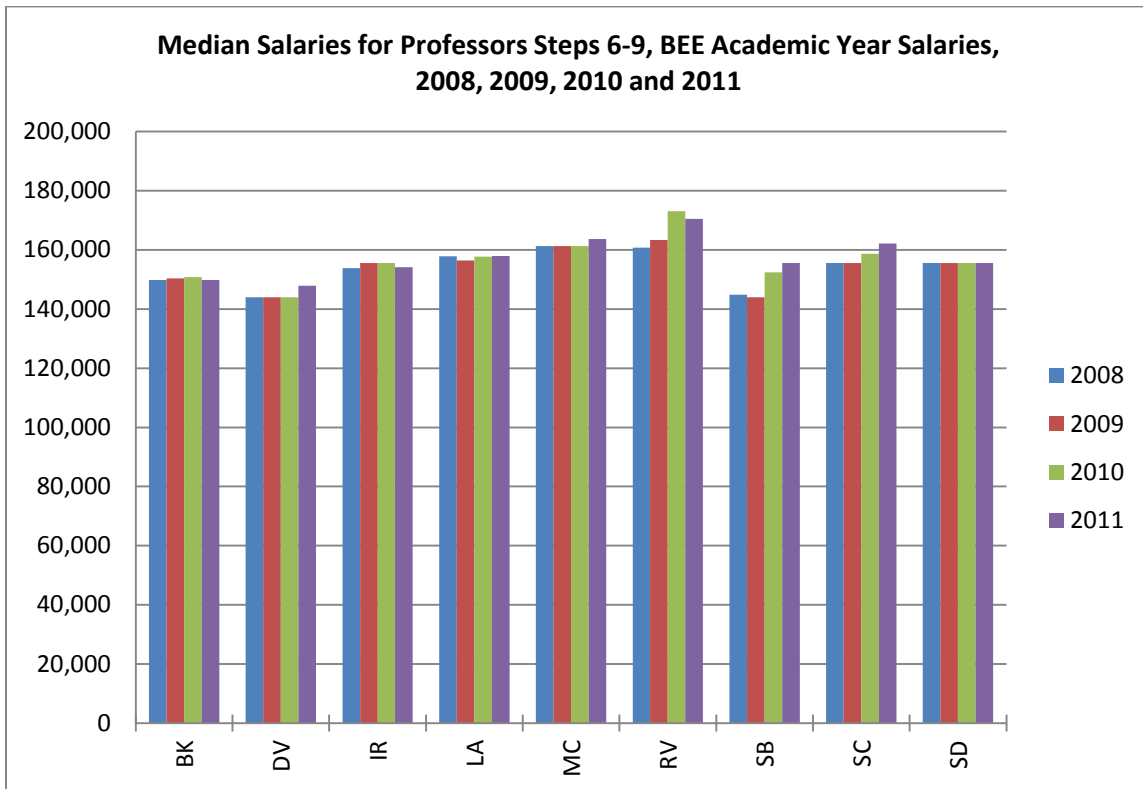

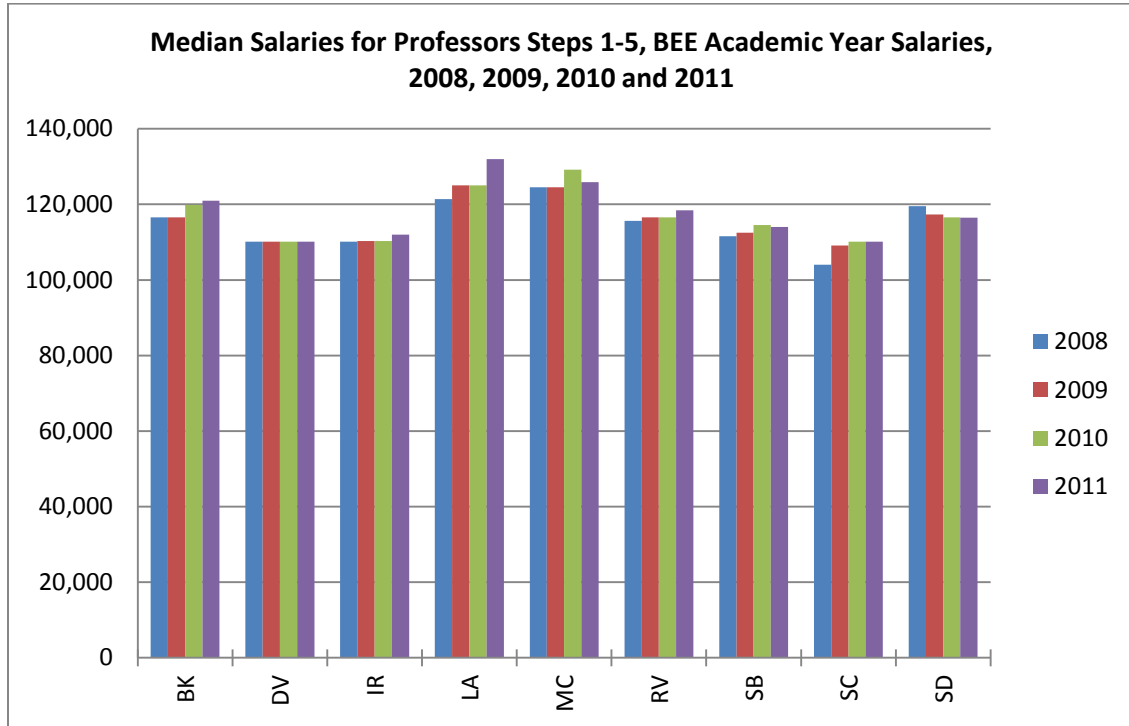

Figure 6. Median salaries for 2008, 2009, 2010 and 2011 for all nine general campuses for Full Professors, Step 1-5 (top) and Full Professors, Step 6-9 (bottom).

TIME FROM DEGREE

In an effort to assess whether the academic advancement of faculty is different at UCSC from at other campuses, data on the number of years since terminal degree was pulled from the UCOP Data Warehouse and plotted against current rank and step. The overlapping steps Assistant Professor 5, Assistant Professor 6, Associate Professor 4, and Associate Professor 5 were omitted since they are used inconsistently between campuses and on some campuses are not used at all. The result is illustrated in Figure 7.

The data suggest that overall UCSC faculty progress normally through the ranks and are not held back in their advancement when compared to other campuses.

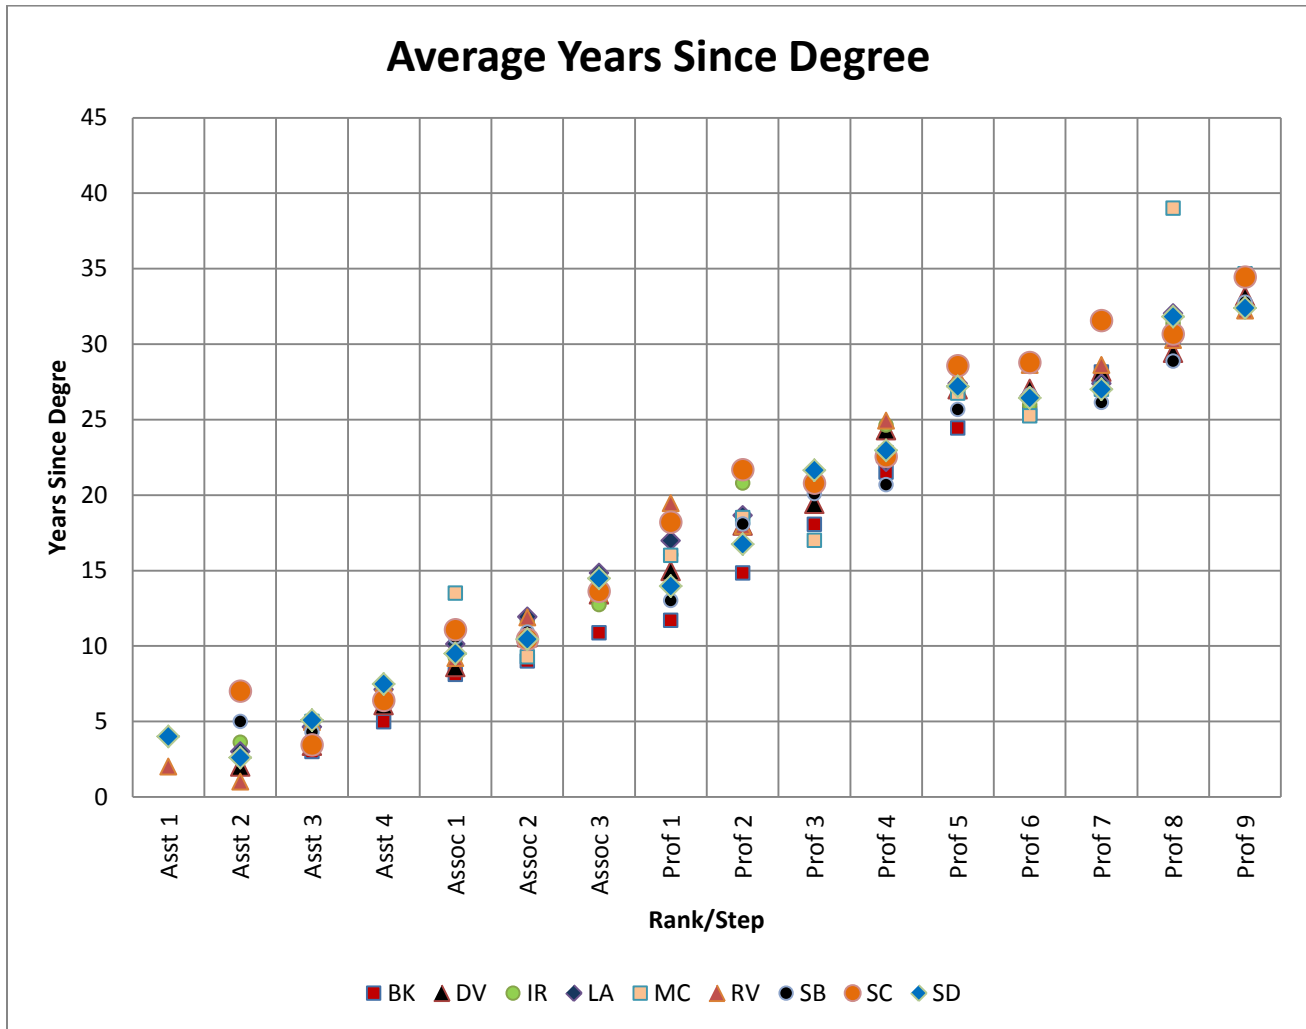

Figure 7. Average years since terminal degree as a function of rank and step for ladder-rank faculty at the nine general campuses. Overlapping steps (Assistant Professor Steps 5 and 6, Associate Professor Steps 4 and 5) are omitted.

It should be noted that “years since terminal degree” is not a required field in the payroll system and is often left blank. Records with no degree date were removed from the dataset, which results in small cell sizes in some cases. In addition, years since degree does not take into account faculty who have taken a nontraditional route and delayed their start in a ladder-rank position. The recommendation of the Joint Task Force was for a report of years since hire into a professorial position. Unfortunately, that

information is not readily available in the Data Warehouse and therefore the dataset does not allow for a thorough analysis of movement through the ranks and is presented for general information.

SUMMARY

The median off-scale salary amount at UCSC was no longer the lowest in the system at any rank on either the Regular or BEE scale by 2009. UCSC's median off-scale salary amount now exceeds the 7-campus median (excluding UCB and UCLA) at most ranks (except for Assistant Professor) for regular ranks faculty and at all ranks for BEE faculty.

The campus continues to make progress toward the goals set out by the Joint Task Force in 2008. The campus' special salary practice regarding advancement actions will be continued through review year 2013-14 to allow us to make additional progress at bringing UCSC faculty salaries in line with those of other UC campuses.

APPENDIX 1

PROCEDURE FOR DATA COLLECTION AND PREPARATION

2011 SALARY DATA

Salary information was drawn from the September, 2011 extract in the University of California Office of the President (UCOP) Corporate Data Warehouse following the procedure used in the previous two reports. The data in this extract does not reflect the merit-based salary adjustment effective October 1, 2011.

2010 SALARY DATA

Salary information was drawn from the July 2010 extract in the University of California Office of the President (UCOP) Data Warehouse following the procedure outlined below for 2009. It is generally the case that not all faculty reviews will be completed and entered in the payroll system by the end of July; however, the extract was taken one month earlier than in 2009 in order to inform decision-making for the 2010-11 review cycle. Data is normally available in the UCOP Data Warehouse 4-6 weeks after the month end, e.g., August salary information will be available in mid-October. The data in this extract did not take into account the 2009-10 Salary Reduction and Furlough Program.

2009 SALARY DATA

Salary information was drawn from the August 2009 extract in the University of California Office of the President (UCOP) Data Warehouse.

- Salary information was drawn only for faculty on the Regular Ladder-rank (REG) academic year salary scale or the Business/Economics/Engineering Ladder-rank (BEE) academic year salary scale.
- Salaries for faculty at the rank of Professor Above-scale are not included in the dataset.
- Salaries for faculty at UC San Francisco are not included in the dataset; there are very few faculty at UCSF who are not on the medical school salary scales.
- In pulling the data, the Corporate Personnel System (CPS) Description of Service (DOS) codes that denote regular or base pay were used. (Regular Pay is defined as values 'AV' and 'HR'. Base Pay is defined as values 'AV', 'AM', 'AW', 'AX', 'HD', and 'HR'.)

Once the data was extracted, it was cleansed by doing the following:

- Deleted any records that did not include a pay rate, or that did not include a step – there are generally 20 or 30 records in this set.
- Eliminated records for faculty associated with the following units (designated as professional schools in report from the Joint Senate-Administration Task Force on Faculty Salaries):

	HOME DEPARTMENT	PROGRAM NAME
BK	Boalt School of Law	JD Program
	Goldman School of Public Policy	Goldman School of Public Policy
	Haas School of Business	Haas School of Business
	School of Inf Mgmt & Sys	School Inf Mgmt & Sys Dean
	School of Optometry	School of Optometry Dean

	School of Public Health School of Social Welfare	School of Public Health School of Social Welfare

- Rolled up all remaining records to obtain one record per individual.

2008 SALARY DATA

The 2008 salary data for both the Regular Ladder-rank academic year and BEE Ladder-rank academic year faculty is based on the datasets used in the 2009 Senate Executive Committee Report on Faculty Salaries. This was a follow-up report to the 2008 Joint Senate-Administration Task Force on Faculty Salaries. The 2008 salary data was provided to the Senate Executive Committee by Professor Lori Klezter who had earlier performed the analysis for the Joint Task Force Report.

The 2008 dataset was drawn from the UCOP Data Warehouse and was cleansed according to the steps laid out above for the 2009 salary data. Professor Klezter modified the 2007 and the 2008 salary data

originally provided by the Academic Personnel Office by removing faculty records associated with professional schools. The same logic for removal of professional schools was followed in the 2009 dataset.

APPENDIX 2

MEDIAN SALARIES AND OFF-SCALE AMOUNTS FOR ACADEMIC-YEAR REGULAR RANKS FACULTY AT THE NINE GENERAL CAMPUSES—2008, 2009, 2010 AND 2011
